Subject Index of Volume 44

Acetic acid
carbonylation of benzyl chloride to phenylacetic acid and its ester using water-soluble Ru(III)–EDTA complex catalyst, 179
Acetylene
in catalysis; one-step synthesis of vinylcarbamates with $[RuCl_2(norbornadiene)]_n$, 175
Activation
oxygen, and formation; dicobalt dioxygen complexes, 1
Alcohol
allyl; allylamine from, 213
1-butanol; TPSR study of, over Zn–Cr–O catalyst, 201
ethylene glycol from dimethyl oxalate; homogeneous catalytic hydrogenation of esters of bicarboxylic acids, 347
Alkanes
cyclohexane; homogeneous oxidation of, by Ru(III) analogue of model peroxidase system Ru(III)–EDTA–ascorbate–H_2O_2, 73
mechanism of hydrogenolysis and isomerization of oxacycloalkanes on metals; transformation of stereoisomeric α,α'-dimethyloxacycloalkanes, 337
Alkenes, Olefins
epoxidation of, using *cis*-dioxomolybdenum complexes as catalysts, 65
iron–phthalocyanine catalyzed epoxidation of, by $KHSO_5$, 187
olefin oxidation to ketones; novel Wacker route based on Ru(III) ion for, 95
one-step synthesis of vinylcarbamates with $[RuCl_2(norbornadiene)]_n$; acetylene in catalysis, 175
and other ligands; catalytic co-oxygenation of, by molecular oxygen at Rh centres, 15
propylene partial oxidation mechanism on Cu_2O; application to last step of; theoretical *ab initio* study of vinylcarbene–CuO complex, 323
Ru-catalyzed esterification of, with methyl formate, 197
Allylamine
from allyl alcohol, 213
Alumina
K-modified Os/alumina catalysts, 295
Amine
allylamine from allyl alcohol, 213
catalytic dimerization of monoethanolamine to *N*-(2-aminoethyl)ethanolamine, 207
influence of polarity of medium on catalysis of formation and stability of Schiff base from pyridoxal 5′-phosphate and n-hexylamine, 313
kinetics of formation of μ-peroxo bis(ethylenediaminetetraacetate)–ruthenate(IV) by reaction of H_2O_2 with ethylenediaminetetraacetate–ruthenate(III) complex, 279
Aminopolycarboxylic acids
and their interaction with molecular oxygen to form Ru(IV)–μ-peroxo complexes; complexes of Ru(III) with, 117
Aromatic compounds
carbonylation of benzyl chloride to phenylacetic acid and its ester using water-soluble Ru(III)–EDTA complex catalyst, 179
excited states of bipyridyl and phenanthroline complexes of Ru(II); photosensitisation of dioxygen-bridged Co(III) dinuclear complexes by, 143
oxidation of 2,6-dimethylphenol by DMAP- and polystyrene-bound DMAP-based Cu catalysts; mechanistic study, 245
pyridoxal 5′-phosphate and n-hexylamine; influence of polarity of medium on catalysis of formation and stability of Schiff base from, 313
Ascorbate
homogeneous oxidation of cyclo-

© Elsevier Sequoia/Printed in The Netherlands

hexane by Ru(III) analogue of model peroxidase system Ru(III)–EDTA–ascorbate–H_2O_2, 73
Aspergillus niger 71
optimalization of purification of *endo*-polygalacturonase from, by affinity chromatography, 165

Carbamates
acetylene in catalysis; one-step synthesis of vinylcarbamates with $[RuCl_2(norbornadiene)]_n$, 175
Carbene
theoretical *ab initio* study of vinylcarbene–CuO complex; application to last step of propylene partial oxidation mechanism on Cu_2O, 323
Carbon bonds
asymmetric reduction of C=C and C=O bonds; stereochemical approach, 217
Carbonyl
ESR spin radical trapping in dehydrohalogenation of alkyl halides catalyzed by molybdenum hexacarbonyl, 259
Carbonylation
of benzyl chloride to phenylacetic acid and its ester using water-soluble Ru(III)–EDTA complex catalyst, 179
Carboxylic acids
complexes of Ru(III) with aminopolycarboxylic acids and their interaction with molecular oxygen to form Ru(IV)–μ-peroxo complexes, 117
homogeneous catalytic hydrogenation of esters of bicarboxylic acids; ethylene glycol from dimethyl oxalate, 347
Catalytic properties
and synthesis and oxygenation of Ru(III) Saloph complexes, 107
Catalytic structure
and activity; effects of ionenes on, of cobalt phthalocyanine; kinetics as function of thiol and oxygen concentrations, 269
Chromatography
affinity; optimalization of purification of *endo*-polygalacturonase from *Aspergillus niger* 71 by, 165
Chromium
new developments in chemistry of peroxo–metal and Cr(VI)–oxidant systems, 129
TPSR study of 1-butanol over Zn–Cr–O catalyst, 201
Cluster
silica surface-grafted Os; hydrogen transfer reduction of hexan-2-one catalyzed by, 183
Cobalt
dicobalt dioxygen complexes; formation and oxygen activation, 1
effects of ionenes on catalytic activity and structure of cobalt phthalocyanine; kinetics as function of thiol and oxygen concentrations, 269
photosensitisation of dioxygen-bridged Co(III) dinuclear complexes by excited states of bipyridyl and phenanthroline complexes of Ru(II), 143
Copper
mechanistic study on oxidation of 2,6-dimethylphenol by DMAP- and polystyrene-bound DMAP-based Cu catalysts, 245
theoretical *ab initio* study of vinylcarbene–CuO complex; application to last step of propylene partial oxidation mechanism on Cu_2O, 323

Dehydrohalogenation
ESR spin radical trapping in, of alkyl halides catalyzed by molybdenum hexacarbonyl, 259
Dimerization
catalytic, of monoethanolamine to *N*-(2-aminoethyl)ethanolamine, 207
Dispersions
colloidal Rh; utilization of sulphonated tripod ligands for stabilization of; catalytic hydrogenations in biphasic liquid–liquid systems, 191

Epoxidation
iron–phthalocyanine catalyzed, of olefins by $KHSO_5$, 187
of olefins using *cis*-dioxomolybdenum complexes as catalysts, 65
Esterification
Ru-catalyzed, of olefin with methyl formate, 197

Esters
carbonylation of benzyl chloride to phenylacetic acid and its ester using water-soluble Ru(III)–EDTA complex catalyst, 179
homogeneous catalytic hydrogenation of, of bicarboxylic acids; ethylene glycol from dimethyl oxalate, 347
kinetics of formation of μ-peroxo bis(ethylenediaminetetraacetate)–ruthenate(IV) by reaction of H_2O_2 with ethylenediaminetetraacetate–ruthenate(III) complex, 279
Ru-catalyzed esterification of olefin with methyl formate, 197
Excited states
of bipyridyl and phenanthroline complexes of Ru(II); photosensitisation of dioxygen-bridged Co(III) dinuclear complexes by, 143

Friedel–Crafts reaction
theoretical insight into catalytic action in, 285

Galacturonase
optimalization of purification of *endo*-polygalacturonase from *Aspergillus niger* 71 by affinity chromatography, 165

Halides
alkyl; ESR spin radical trapping in dehydrohalogenation of, catalyzed by molybdenum hexacarbonyl, 259
Hexan-2-one
hydrogen transfer reduction of, catalyzed by silica surface-grafted Os cluster, 183
Hydrogenation(s)
catalytic, in biphasic liquid–liquid systems; utilization of sulphonated tripod ligands for stabilization of colloidal Rh dispersions, 191
homogeneous catalytic, of esters of bicarboxylic acids; ethylene glycol from dimethyl oxalate, 347
Hydrogenolysis
and isomerization of oxacycloalkanes on metals; mechanism of; transformation of stereoisomeric α,α′-dimethyloxacycloalkanes, 337
Hydrogen peroxide
homogeneous oxidation of cyclohexane by Ru(III) analogue of model peroxidase system Ru(III)–EDTA–ascorbate–H_2O_2, 73
kinetics of formation of μ-peroxo bis(ethylenediaminetetraacetate)–ruthenate(IV) by reaction of H_2O_2 with ethylenediaminetetraacetate–ruthenate(III) complex, 279
Hydrogen transfer reduction
of hexan-2-one catalyzed by silica surface-grafted Os cluster, 183

Ionenes
effects of, on catalytic activity and structure of cobalt phthalocyanine; kinetics as function of thiol and oxygen concentrations, 269
Iron
–phthalocyanine catalyzed epoxidation of olefins by $KHSO_5$, 187
Isomerization
and hydrogenolysis of oxacycloalkanes on metals; mechanism of; transformation of stereoisomeric α,α′-dimethyloxacycloalkanes, 337

Ketones
hexan-2-one; hydrogen transfer reduction of, catalyzed by silica surface-grafted Os cluster, 183
novel Wacker route based on Ru(III) ion for olefin oxidation to, 95

Manganese
coordination of dioxygen and other small molecules by manganese(II) phosphine complexes, 35
Molybdenum
epoxidation of olefins using *cis*-dioxomolybdenum complexes as catalysts, 65
ESR spin radical trapping in dehydrohalogenation of alkyl halides catalyzed by molybdenum hexacarbonyl, 259
Monoethanolamine
catalytic dimerization of, to *N*-(2-aminoethyl)ethanolamine, 207

Norbornadiene
acetylene in catalysis; one-step synthesis of vinylcarbamates with $[RuCl_2(norbornadiene)]_n$, 175

Olefins: see Alkenes
Optimalization
of purification of *endo*-polygalacturonase from *Aspergillus niger* 71 by affinity chromatography, 165
Osmium
K-modified Os/alumina catalysts, 295
silica surface-grafted Os cluster; hydrogen transfer reduction of hexan-2-one catalyzed by, 183
Oxidant systems
new developments in chemistry of peroxo–metal and chromium(VI)–oxidant systems, 129
Oxidation
of 2,6-dimethylphenol by DMAP- and polystyrene-bound DMAP-based Cu catalysts; mechanistic study, 245
homogeneous, of cyclohexane by Ru(III) analogue of model peroxidase system Ru(III)–EDTA–ascorbate–H_2O_2, 73
olefin, to ketones; novel Wacker route based on Ru(III) ion for, 95
propylene partial, mechanism on Cu_2O; application to last step of; theoretical *ab initio* study of vinylcarbene–CuO complex, 323
Ru(III)–EDTA catalyzed, of saturated organic compounds by molecular oxygen; thermodynamics of, 85
Oxygen
asymmetric reduction of C=C and C=O bonds; stereochemical approach, 217
dioxygen:
-bridged Co(III) dinuclear complexes; photosensitisation of, by excited states of bipyridyl and phenanthroline complexes of Ru(II), 143
dicobalt, complexes; formation and oxygen activation, 1
and other small molecules; coordination of, by manganese(II) phosphine complexes, 35
molecular:
catalytic co-oxygenation of alkenes and other ligands by, at Rh centres, 15
complexes of Ru(III) with aminopolycarboxylic acids and their interaction with, to form Ru(IV)–μ-peroxo complexes, 117
thermodynamics of Ru(III)–EDTA catalyzed oxidation of saturated organic compounds by, 85
and thiol concentrations; kinetics as function of; effects of ionenes on catalytic activity and structure of cobalt phthalocyanine, 269
TPSR study of 1-butanol over Zn–Cr–O catalyst, 201
Oxygenation
catalytic co-, of alkenes and other ligands by molecular oxygen at Rh centres, 15
and synthesis and catalytic properties of Ru(III) Saloph complexes, 107

Peroxidase system
model, Ru(III)–EDTA–ascorbate–H_2O_2; homogeneous oxidation of cyclohexane by Ru(III) analogue of, 73
Phosphorus
coordination of dioxygen and other small molecules by manganese(II) phosphine complexes, 35
influence of polarity of medium on catalysis of formation and stability of Schiff base from pyridoxal 5′-phosphate and n-hexylamine, 313
Photosensitisation
of dioxygen-bridged Co(III) dinuclear complexes by excited states of bipyridyl and phenanthroline complexes of Ru(II), 143
Phthalocyanine
cobalt; effects of ionenes on catalytic activity and structure of; kinetics as function of thiol and oxygen concentrations, 269
–iron catalyzed epoxidation of olefins by $KHSO_5$, 187
Polarity
of medium; influence of, on catalysis of formation and stability of Schiff base from pyridoxal 5′-phosphate and n-hexylamine, 313
Polystyrene
mechanistic study on oxidation of 2,6-dimethylphenol by DMAP- and polystyrene-bound DMAP-based Cu catalysts, 245
Potassium
iron–phthalocyanine catalyzed epoxidation of olefins by $KHSO_5$, 187
-modified Os/alumina catalysts, 295

Reduction
asymmetric, of C=C and C=O bonds; stereochemical approach, 217
hydrogen transfer, of hexan-2-one catalyzed by silica surface-grafted Os cluster, 183
Rhodium
catalytic co-oxygenation of alkenes and other ligands by molecular oxygen at Rh centres, 15
catalytic hydrogenations in biphasic liquid–liquid systems; utilization of sulphonated tripod ligands for stabilization of colloidal Rh dispersions, 191
Ruthenium
complexes of Ru(III) with aminopolycarboxylic acids and their interaction with molecular oxygen to form Ru(IV)–μ-peroxo complexes, 117
excited states of bipyridyl and phenanthroline complexes of Ru(II); photosensitisation of dioxygen-bridged Co(III) dinuclear complexes by, 143
μ-peroxo bis(ethylenediaminetetraacetate)–ruthenate(IV) by reaction of H_2O_2 with ethylenediaminetetraacetate–ruthenate(III) complex; kinetics of formation of, 279
Ru(III) analogue of model peroxidase system Ru(III)–EDTA–ascorbate–H_2O_2; homogeneous oxidation of cyclohexane by, 73
Ru-catalyzed esterification of olefin with methyl formate, 197
$[RuCl_2(norbornadiene)]_n$; one-step synthesis of vinylcarbamates with; acetylene in catalysis, 175
Ru(III)–EDTA catalyzed oxidation of saturated organic compounds by molecular oxygen; thermodynamics of, 85
Ru(III) ion for olefin oxidation to ketones; novel Wacker route based on, 95
Ru(III) Saloph complexes; synthesis, oxygenation and catalytic properties of, 107
water-soluble Ru(III)–EDTA complex catalyst; carbonylation of benzyl chloride to phenylacetic acid and its ester using, 179

Schiff base
influence of polarity of medium on catalysis of formation and stability of, from pyridoxal 5′-phosphate and n-hexylamine, 313
Silica
hydrogen transfer reduction of hexan-2-one catalyzed by silica surface-grafted Os cluster, 183
Spectroscopy
ESR spin radical trapping in dehydrohalogenation of alkyl halides catalyzed by molybdenum hexacarbonyl, 259
TPSR study of 1-butanol over Zn–Cr–O catalyst, 201
Sulphur
catalytic hydrogenations in biphasic liquid–liquid systems; utilization of sulphonated tripod ligands for stabilization of colloidal Rh dispersions, 191
effects of ionenes on catalytic activity and structure of cobalt phthalocyanine; kinetics as function of thiol and oxygen concentrations, 269
iron–phthalocyanine catalyzed epoxidation of olefins by $KHSO_5$, 187
Synthesis
one-step, of vinylcarbamates with $[RuCl_2(norbornadiene)]_n$; acetylene in catalysis, 175
and oxygenation and catalytic properties of Ru(III) Saloph complexes, 107

Thermodynamics
of Ru(III)–EDTA catalyzed oxidation of saturated organic compounds by molecular oxygen, 85

Vinyl
one-step synthesis of vinylcarbamates with $[RuCl_2(norbornadiene)]_n$; acetylene in catalysis, 175
theoretical *ab initio* study of vinylcarbene–CuO complex; application to last step of propylene partial oxidation mechanism on Cu_2O, 323

. Wacker route
novel, based on Ru(III) ion for olefin oxidation to ketones, 95
Water
–gas shift reaction; homogeneous catalysis of, 357
-soluble Ru(III)–EDTA complex catalyst; carbonylation of benzyl chloride to phenylacetic acid and its ester using, 179
Zinc
TPSR study of 1-butanol over Zn–Cr–O catalyst, 201
